### **DETAILED ACTION**

Applicant's amendment dated 11/01/2004 has been received and entered. By the amendment, claims 1-2 are remain pending in the application.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-2 stand rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Regarding claim 1, as stated in the previous office action, it has been that the functional "if any" statement does not define any structure in the claim (e.g., step of etching the gate insulating layer, step of forming contact-slits, a piece of conductive material) and accordingly cannot serve to distinguish.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-2 stand rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's admitted prior art (APA), figures 1-3, as stated in the previous office action.

Art Unit: 2871

The above claims are anticipated by APA's figures 1-3 which disclose a method of fabricating a liquid crystal display (LCD) device comprising the step of :

- . preparing a substrate (1);
- . patterning a first conductive layer (gate layer 2) and storage electrode layer (12);
- . covering a first layer with a gate insulating layer (3);
- . patterning an amorphous silicon layer (4);
- . forming a contact slit (6) extends through a part of the gate insulating layer as claimed

(see figure 3)

- . patterning a second conducting layer (source 7 and drain 8);
- . patterning a transparent material layer (pixel 9).

It should be noted that step (e) in the method claims is not clear as stated above; therefore, such step has not been fully either examined on the merit or indicated as allowable subject matter.

Although claim 1 is now amended to delete the usage of "if any" (first occurrence in step e, claim 1), such amendment are not sufficient to overcome since "if any" condition (second occurrence in claim 1) still appears in claim and rendering the scope of claim indefinite as stated above.

### ***Response to Arguments***

5. Applicant's arguments filed 11/01/2004 have been fully considered but they are not persuasive as stated above.

*Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
